Q7. Does the building have an approved performance-based solution that has addressed the relevant considerations for fire spread in the external wall assembly of the building?

No

Q8. PART A Have you obtained test data relating to the combustibility of the material that makes up the cladding including the insulation or sarking located behind the cladding?

Yes

Q8. PART B Will the fire performance of the external wall assembly contribute to the defeat of one or more aspects of the building's fire strategy?

No

Q9. Is building work likely to be required to rectify issues related to the fire performance of the external wall assembly?

Q10. Will Fire Safety Risk Mitigation Measures be required while further fire engineering assessment and/or building rectification work is completed?

I state with reference to the Building Fire Safety Risk Assessment and section 16X(2)(b) and (c) of the Regulation, that there IS NO cladding fire risk for the building.

And I make this solemn declaration conscientiously believing the same to be true and by virtue of the provisions of the Oaths Act 1867.
